

NORTH EASTERN RAILWAY

OFFICE OF THE
GENERAL MANAGER (ENGG.)
GORAKHPUR
Dated 31.12.1973.

NO.W/275/O/Pt.II/W-4A

CE'S P.WAY CIRCULAR NO.64 OF DEC.1973.

SUB: MARKING OF RAIL LEVEL.

It is a common experience that during the course of years of track maintenance, the track gets lifted considerably over the level originally laid. To help in maintenance of the track at its correct level, it has been decided that the existing rail level at every KM post (already erected as per RDSO's Drawing No.ED0/B-1) should be transferred and marked on the two edges thereof by a horizontal chase of triangular section 20mm wide and 15 mm deep, the deep corner of which should be at the rail level. (See sketch below).

On the course, the level of the inter-rail shall be transferred.

Sd/-
for GENERAL MANAGER (ENGG.),
