

NORTH EASTERN RAILWAY

CE'S P.WAY CIRCULAR NO. 4 OF 1959.

CASE NO.W/67/13/W-7

Due to heavy storm, there was an accident on this Railway and one of the lighting gantries in a marshalling yard fell down. Enquiries made, revealed that the completed works were not handed over properly to the organisation responsible for the maintenance of the gantries. As a result of this no responsibility could be fixed on either parties and in fact it transpired during the enquiry that the cause of the accident was loosening of the nuts of the holding down bolts by some mischievous elements. It is, therefore, brought to the notice of all concerned that there should be no such slackness in handing over and taking over of works completed by the authority, to be maintained by the other. Where nuts of the holding down bolts ends are burred or nuts tack-welded on to the bolts, the same are not capable of being easily loosened by mischievous elements.
