[C] In case tenderer participates as an authorized agent, then the performance as required above shall be that of Principal authorizing the agent. It may so happen that the agent has credentials of past supply for a different Principal but this will not be considered as performance for placing bulk order in case of change of Principal.

2.9.2 “Capacity-cum-Capability” for Developmental order:

For consideration of developmental orders upto 20% of NPQ, the tenderes must be able to demonstrate their Capacity-cum-Capability to manufacture the tendered item. For this purpose they should submit alongwith their offer, documented past performance reports of same or similar items of equivalent rating or equivalent performance parameters, details of M&P, testing facilities, QAP (if available), technical manpower available with them, registration for same/similar item(s) with other Government agencies or PSUs etc. or any other details as may be warranted as per the technical specification and drawing. Such tenderers are to note that non submission of such documents as per Annexure 5.1 shall be taken as their not having any such past performance and/or capacity, and their offer shall be considered further as per extant rules and no back reference in this regard will be made to them.

2.9.3 Material to be procured from OEM or their authorized dealers / distributors:

- (a) Wherever so specified, the Railways reserve the right to place orders for either entire or bulk quantity on OEMs or their authorized dealers.
- (b) Any firm quoting on behalf of OEM must submit tender specific authorization certificate along with their offer and agree for inspection by the nominated agency (as the case may be) at the premises of their principals, failing which their offer shall be liable to be rejected.
- (c) The following would be preferred in such cases:
 - (i) Inspection by RITES/RDSO/Nominated agency at the manufacturing premises of the relevant manufacturer. RITES/RDSO/Nominated agency shall categorically confirm in the Inspection Certificate, that inspection of the material has been actually made in the manufacturing premises of the manufacturers and not in the warehouse/Godown/Shop of the dealer
 - (ii) Direct dispatch from the premises of the manufacturer to the Railways consignee after inspection and acceptance by RITES/ RDSO.
 - (iii) Submission of Manufacturer's Test and Guarantee Certificate with each lot of supply.

- (d) The OEM / Authorized dealers / agents must comply the following conditions, failing which their offer(s) will be ignored:
- (i) In a tender, either the Indian Agent on behalf of the Principal/OEM or Principal/OEM itself can bid but both cannot bid simultaneously for the same item/product in the same tender.
 - (ii) If an agent submits bid on behalf of the Principal/OEM, the same agent shall not submit a bid on behalf of another Principal/OEM in the same tender for the same item/product.

2.10. Option Clause:

Unless otherwise indicated Railway reserves the right to cancel the tender for full or part tendered quantity without assigning any reason. However, purchaser will have discretion to accept an offer for quantities which are up to 30% higher than the tendered quantity. The rates quoted by the tenderers for the full quantity would be taken as valid.

Purchaser also reserves the right to increase or decrease the ordered quantity, after giving reasonable notice, by a maximum of 30% (i.e. $\pm 30\%$) after the placement of order during the currency of the contract. The increase in quantity, however, is subject to keeping the overall quantity increase on all the successful tenderers within 30% of the bid quantity.

2.10.1. As per extant instruction, operation of the option clause can be made any time within delivery period of the contract giving reasonable time to the firm to supply the enhanced quantity. It may be noted that for invocation of the option clause, validity of the contract will be considered upto the delivery period mentioned in the contract even though the supplies have been completed in advance

2.10.2. For operation of the (-) 30% option clause, consequent to decrease in the prices in subsequent contracts, reasonable notice will be served by giving reasonable opportunity to the contractor to unconditionally agree to accept such lower rates for the unsupplied quantity on the date of issuing such notice. In the event of the firm not agreeing for reduction in rate for the unsupplied quantity, the purchaser reserves the right to operate (-) 30% of the ordered quantity or the unsupplied quantity, whichever is lower. Notwithstanding anything stated above, purchaser reserves the right to operate the option clause upto (-) 30% of the ordered quantity or the unsupplied quantity, whichever is lower after giving reasonable notice.

2.10.3. Reasonable notice as mentioned in above Para is only for purpose of allowing the contractor to make necessary arrangements and same is not for seeking any consent from the contractor towards exercise of contractual option clause.

2.10.4. In case of Delivery Period is extended in the contract with (+) 30% option clause either for full ordered quantity or a part quantity which remained unsupplied on the date of expiry of the original Delivery Period, then during the extended Delivery Period also, quantity variations can be made on the total ordered quantities.

2.11. Pilot Sample:

2.11.1. Whenever, in terms of the contract, firm is required to submit pilot sample, they will be required to submit minimum three samples for approval, if not specified otherwise. Out of that, one sample, if found suitable after testing, will be returned to the firm for reference purpose and for the guidance of the Inspection Agency, if required. One sample duly approved shall be retained by the Depot officer. The 3rd sample, if get destroyed during the testing, shall be accounted for by the Depot officer, provided same gets passed and found suitable during testing.

2.11.2. In the event of a pilot sample failing the inspection/tests, all the samples whether intact or broken during a destructive test as the case may be, shall be returned to the supplier along with the inspection report, if any, provided by the inspecting/testing agency.

2.11.3. Submission and collection of the sample shall be sole responsibility of the supplier.

2.12. Quantity to be ordered:

2.12.1. Railways reserves the right to cancel the tender for full or part quantity tendered without assigning any reason. The rates quoted by the tenderers for the full quantity would be taken as valid even for part quantity.

2.12.2. Wherever considered necessary by the purchaser, the quantity to be ordered can be split amongst two or more sources for ensuring better availability of material keeping in view the vital / critical nature of item, quantity to be procured, delivery requirements, capacity of the firms and past performance of the firms, in fair, transparent and equitable manner. In such cases the provisions of para 2.13 shall be normally applicable

2.12.3. The Controller of Stores or any officer authorized on behalf of President of India acting through, General Manager is not bound to accept the lowest or any offer nor to assign any reason for doing so and reserves the right to accept any offer in respect of the whole or any portion of the item specified in the tender and contractor shall be required to supply at the rate quoted.

2.13 Splitting of tendered quantity

2.13.1 Case of no prior decision to split the order

2.13.1.1 Normally full order should be placed on L-1 firm. However, if after due processing, it is discovered that the quantity to be ordered is more than what L-1 alone is capable of supplying and there was no prior decision to split the quantities, then this aspect should be decided by the purchaser. The quantity being finally ordered will be distributed among the other bidders in a manner that will be fair, transparent and equitable. The manner of splitting will take specific note of the following parameters :

- i) Past performance of bidders
- ii) Capacity of bidders
- iii) Delivery requirements in the tender
- iv) Quantity under procurement
- v) Vital/safety nature of items

2.13.1.2 In the absence of any differentiation on the above parameters, the manner of splitting will be based on the stipulation given in para 2.13.2 below.

2.13.2 Case of pre-decided split ordering:-

2.13.2.1 Railway may decide in advance to have more than one source of supply on account of delivery requirement in tender, past performance and capability of bidders, quantity under procurement and vital/safety nature of items.

2.13.2.2 Following provisions {2.13.2.2 (A) to 2.13.6} shall be applicable in all such cases of pre-decided split ordering:-

- A) The purchaser reserves the right to distribute the procurable quantity on one or more than of the eligible tenderers. Zone of consideration of such eligible tenderers will be the right of the Purchaser. The zone of consideration will be a dynamic mix of inter-se position of firms, supply performance of the firms, quantity being procured, criticality of and lead time of supply of the item, number of established suppliers, their capacity etc.
- B) Whenever such splitting of the procurable quantity is made, the quantity distribution will depend (in an inverse manner) upon the differential of rates quoted by the tenderers (other aspects i.e. adequate capacity-cum-capability, satisfactory past performance of the tenderers, outstanding order load for the Railway making the procurement, quoted delivery schedule vis-à-vis the delivery schedule incorporated in the tender schedule incorporated in the tender enquiry etc. being same/similar) in the manner detailed in the table below:

Price differential between L1 & L2	Quantity distribution ration between L1 and L2
Upto 3%	60:40
More than 3% and upto 5%	65:35
More than 5%	At least 65% on the L1 tenderer. For the quantity to be ordered on the L2 tenderer, TC/TAA shall decide

In the phrase 'differential rates quoted by the tenderers, the quoted rate would mean :

- i) When no price negotiation has been called for, the original rates as obtained at the time of tender opening. However, the rate of the highest eligible tenderer within the zone of consideration has to be per se reasonable.
 - ii) When price negotiation has been called for, the reference L1 rate for assessment of ratio will be the original rate of L1 firm (suitable for bulk quantity)- say firm "A"- as obtained at the time of tender opening.
- B(I)** If splitting of quantity is required to be done by ordering on tenderers higher than the L2 tenderer, then the quantity distribution proportion amongst the tenderers will be decided by transparent/logical/equity based extrapolation of the model as indicated in the above para.
- B(II)** There could be a situation when between the lowest firm considered suitable for bulk Qty. (L1 firm 'A') and another firm considered suitable for bulk quantity order, there are firms who are considered suitable only for part quantity. For example, say L1 firm 'A' is part I firm, L4 is part I firm (and both considered suitable for bulk quantity order) and splitting is to be done between these two part-I firms. But there are two part-II firms in between who are suitable for part quantity. In such cases, L1 should be given its proportion based on its rate differential with respect to L4, (say by this, L1 gets 65% of NPQ). The balance Qty. (say 35% of NPQ) is to be distributed among other firm.

The balance quantity is to be distributed as follows:

- (a) Allocate the Pt II L2 and Pt II L3 within the overall ceiling of 15%/25% (of 35% of NPQ)
- (b) Allocate the balance quantity to L4 firm.

Since the Pt II firm are being given the order in relation to its lower position w.r.t. L4 (Pt I Firm), it will not attract the provision of 'order on Pt II firm should not be at higher rate than PT I firm' as the reference rate for comparison of L2 Pt II and L3 Pt II rate is the L4 Pt I rate.

2.13.2.3 In case of pre-decided splitting, if the purchaser decides not to split the ordered quantity, the reason for the same should be recorded in TC minutes/acceptance in direct acceptance cases.

2.13.2.4 Notwithstanding the above, there can be exceptional situations where Purchaser may come to a conclusion that splitting is neither possible nor feasible and/or not desirable in the administrative interest. In such exceptional situations, Purchaser reserves the right not to split the quantity despite pre-decided splitting clause in the tender condition.

2.13.3 For cases where the Rlys./PUs had entered into Tot/JV agreements, the following clause should be stipulated as tender conditions:

As the Rly. has entered into Tot/JV agreement with no. of firms, they reserve the right to place orders on all such Tot/JV agreements partners. However, for ratio/proportion o quantity distribution among such agreement partners, conditions as detailed in para 2.13.2.2 (B) shall apply with the exception that the aspect of 'per-se responsibility.

2.13.4 In the cases of inadequate capacity-cum-capability, dissatisfactory past performance, large quantity of outstanding orders (liquidation of which will take very long time) etc., the purchaser shall have the right to distribute the procurable quantity amongst tenderers with due consideration to these constraints and in such a manner that would ensure timely supply of material in requisite quantity to meet the needs of operation, maintenance, safety etc. of the Railways, regardless of inter-se ranking of the tenderers and in a fair and transparent manner with due conformity to the Principles of Natural Justice and Equity.

2.14. Warranty/Guarantee:

2.14.1. Warranty period mentioned in specification/MDTS is applicable. If warranty period is not mentioned in respective specification/MDTS, standard warranty period as mentioned in IRS conditions is applicable.

In case, there is a discrepancy regarding warranty period mentioned in specification/MDTS and standard warranty clause, then warranty period mentioned in specification/MDTS shall prevail.

Tenderers should further note that if the Guarantee/Warranty is a part of the tendered specification and/or tender schedule, then any deviation on this count, shall be treated as a technical deviation, which may render their offer technically unsuitable. **Bidders are advised to bring such deviation(s) clearly in the technical deviation statement. In case, this deviation is not indicated in the technical deviation statement, it will be presumed that offer is as per the tendered specification in all respect. Any ambiguity in this regard or any other respect shall be to the disadvantage of the bidder.**

Further, Suppliers shall ensure that the materials are invariably stamped with manufacturers name and month & year of manufacture as may be detailed in drawing/specification of material to enable correct reckoning of warranty.

2.14.2. Bank Guarantee towards Warranty obligation:

For items like machinery and Plant, Costly equipment, capital spares, the tenderer, wherever called upon to do so, shall furnish a Bank Guarantee of 10% of Material value to cover their warranty obligation. The model proforma of the Warranty/Guarantee bond is annexed as Annexure 5.4. It would be the responsibility of the contractor to ensure that Bank Guarantee (BG) required to be submitted by them, should be sent directly by the issuing Bank under registered Post to the concerned Purchasing Authority and, in no case should be brought by the tenderer. That is to say, the firm shall not involve themselves in transmission of the BG between the issuing bank and the purchaser.

2.15. Risk Purchase Clause:

Alternatively, Railway also reserves the right to cancel the contract by imposing General damages @10% of the **outstanding** value of Contract, and in case SD money has been taken, the same shall be forfeited and adjusted towards General damages so imposed. - ii) Copies of all the notifications can be downloaded from <http://meity.gov.in/esdm/pma>.
- iii) The quantity of procurement for which the preference will be provided to domestic manufacturers shall be percentage of the net procurable quantity as specified in the relevant notifications issued by Concerned Ministry/Department indicated in sub para (i) above and can be downloaded from the websites of respective ministries/departments.
- iv) Percentage of domestic value addition which qualifies the electronic product to be classified as domestically manufactured shall also be as specified in the relevant

notifications issued by Concerned Ministry/Department indicated in sub para (i) above and can be downloaded from the websites of respective ministries/departments.

- 2.23.3** In terms of above referred guidelines, domestic manufacturers are required to upload the domestic value addition in terms of Bill of Materials (BOM) for the quoted product alongwith their offer in the following format, failing which their offer will not be eligible for purchase preference under this policy:-

Item No.	Item Description	Domestic value addition in percentage

If L1 offer is of a domestic manufacturer, the said tenderer will be awarded full value of the order. If L1 offer is not from a domestic manufacturer, the value of the order awarded to L1 tenderer will be the balance of procurement value after reserving specified percentage of the total value of the order for the eligible domestic manufacturer. Therefore, the lowest tenderer among the domestic manufacturers, whether L2, L3, L4 or higher, will be invited to match L1 offer in order to secure the procurement value of the order earmarked for the domestic manufacturer. In case first eligible tenderer (i.e. domestic manufacturer) fails to match L1 offer, the tenderer (i.e. domestic manufacturer) with next higher offer will be invited to match L1 offer and so on. However, Railway may choose to divide the order among more than one successful tenderer as long as all such tenderer match L1 and the criteria for allocating the tender quantity amongst a number of successful tenderer is clearly articulated in the tender document itself. In case, all eligible domestic manufacturers fail to match the L1 offer, the actual tenderer holding L1 offer will secure the order for full procurement value. Only those domestic manufacturers whose offers are within 20% of the L1 offer would be allowed an opportunity to match L1 offer”.

- 2.23.6** In case of turnkey/system integration projects, eligibility of a tenderer as a domestic manufacturer would be determined on the domestic value addition calculated only for the value of notified DMSPs forming part of the turnkey/system integration projects and not on the value of whole project.

2.24 **Public Procurement Policy for Preference to Make in India:**

2.26 Handling of rejection of pre-inspected item and warranty rejections :

1. As per CVC guidelines, following steps are required to streamline the existing procedure to deal with handling of rejection in pre-inspected items and warranty rejections.

1.1 Two kinds of rejection occur in case of pre-inspected supplies made by vendors.

- A. Pre-inspected material rejected by consignee at the time of receipt
- B. Material rejected in warranty.

The methodology of handling these rejections are dealt with below:

- A. Pre-inspected material rejected by consignee at the time of receipt
 - (i) In case of rejection of pre-inspected goods at consignee end, the material rejection advice/memo should be sent by consignee to all concerned i.e. firm, purchaser, pre-inspecting agency, paying authority as per the contract etc. without fail.
 - (ii) *Financial recovery:* In case payment has been made to the firm for the material, the concerned paying authority as per contract should note the rejection advice details in its recovery register for effecting recovery of payments made, as the case may be.
 - (iii) joint inspection of rejected material will be held with pre-inspecting agency and the firm. In case of failure of either of the two parties to associate with joint inspection, the joint inspection should be held by the consignee with whichever of the two parties comes for joint inspection. Irrespective of whether the party(ies) attend joint inspection or not, the modality of joint inspection etc will have to be completed within 21 days of communication of rejection advices to the supplier (in line with IRS Conditions of Contract clause 703). For imported material, the time limit will be 45 days.
 - (iv) Firm may be permitted to collect the rejected goods only after joint inspection(in case it is pre-inspected) and the firm has also deposited the payments already made by Railway (if any) to the firm or equivalent amount has been recovered for this purpose.
 - (v) In case of replacement supply against the rejected goods, the same should be pre-inspected by same pre-inspecting agency who passed the material earlier. In line with IRS conditions of Contract clause 703, no inspection charge will be paid by Railway to the inspection agency for the replacement supply.
 - (vi) However, in case of component level rejection in an pre-inspected item (which is an assembly) the replacement supply of that component can be accepted based on firm's internal inspection certificate/guarantee certificate and final inspection by consignee.

B. Material rejected in warranty:-

1. Material are rejected in warranty in the following situations:-

- a) The material rejected was issued to the user(shop/shed etc) from its associate stores depot.
- b) The material rejected was received by the from a PU or from a stores depot which is not the associate stores depot of the user.

Cat. B.1(a): *For warranty failure in shop/shed of material issued from its associate stores depot:* All warranty claims will be lodged by the associate depot officer after getting the warranty rejected material from user under advice note of return stores with reasons of warranty rejection indicated therein. Before lodging the warranty claim the associate depot officer will satisfy himself about the correctness of PO and ensure that other details including reason(s) of warranty rejection are available with the advice note of return stores. The warranty claim will be processed following the procedure indicated in sub-para A(i), (ii), (iii) and (iv) of para 1.1A above except for the following changes: The 'rejection advice' mentioned in para 1.1A(i) will be replaced by the 'warranty rejection advice'. The time which can be taken for the completion of modality of joint inspection as per para 1.1A(iii) will be 45 days (instead of 21 days) from the date of communication of rejection advice to the supplier. More time is being given for joint inspection because this is a case wherein supplies have already been taken into the usage system of Railways. Thus, either the pre-inspection agency or the firm or the railways may like to have a more detailed understanding of the failure:

Cat BI(b): *For warranty failure in shop/shed of material received from PU (either under sale issue note or as a purchased component of rolling stock manufactured at the PU) Or from a stores depot (under inter depot transfer/sale issue note) which is not the associate stores depot of the end user:*

- (i) In such cases it may not be convenient for the end user to return the material to the stores depot (against which the original supply was made by the vendor to railway). Thus in all such cases, the warranty rejected material will be kept in safe custody by the end user and the stores depot (which received the original supply) will be advised by the end user about the warranty rejection duly indicating the reason(s) of rejection with a confirmation that the rejected material is under end user's custody.
- (ii) The stores depot (which received the original supply) will raise warranty claim on the firm. Before lodging the warranty claim, the depot officer will satisfy himself about the correctness of PO and ensure that other details including reason(s) of warranty rejection are available from the end user. The warranty claim will be processed following procedure indicated in sub-para A (i), (ii), (iii) and (iv) of para 1.1A above except for the following changes. The 'rejection advice' mentioned in para 1.1A(i) will be replaced by the 'warranty rejection advice'. The time which can be taken for the completion of modality of joint inspection as per para 1.1A(iii) will be 45 days (instead of 21 days) from the date of communication of rejection advice to the supplier. More time is being given for joint inspection because this is a case wherein supplies have already been taken into the usage system of Railways. Thus, either the pre-inspection agency of the firm or the railways may like to have a more detailed understanding of the failure.

For imported material, the time limit in Cat I(a) and Cat I(b) will be 90 days.

II. Warranty quantity replacement: The warranty quantity replacement will be accounted under warranty R-note by the depot officer (which raised the warranty claim as in sub-para B.I (a) above).

Financial recovery (if any made) against the warranty failure will be refunded to the firm on warranty quantity replacement.

III. Inspection of the replacement supply against warranty rejection:

- (A) For cases of replacement supply against warranty failure falling in the category BI (a) above, the replacement supply should normally be inspected by the same inspection agency which inspected and passed original supply. Thus for B.I.(a), any change in inspecting authority for the warranty replacement will necessitate a formal amendment in contract.

- (B) In case of warranty rejection of item of the category B.I (b) above, it may in some cases be difficult to re-use the services of inspecting agency which passed the original supply. Similarly for some items, the end user/consignee may not have the requisite inspection facility/expertise.

Thus for warranty rejection falling in the category B.I (b) above:-

- (i) The replacement supply can be inspected by the same inspecting agency which inspected and passed the original supply. Payment of inspection charges will be borne by supplier.

OR

The replacement supply can be inspected by authorised representative of consignee.

OR

The replacement supply can be made by firms own internal inspection certificate.

- (ii) The decision on the above will rest with the depot officer who raised the warranty claim and will be indicated in the warranty claim notice.

- (C) However in case the warranty failure is of a component of an assembly supplied, the component can be accepted on firm's own Guarantee Certificate/internal inspection certificate and consignee's final inspection for both the categories {cat B.1(a) and Cat B 1 (b)} of warranty failure.

- (IV) Place of warranty replacement:- For warranty replacement of category B.I (a), in order to ensure correct accountal of warranty replacement, the place of warranty replacement will be the depot which received the original supply. For warranty replacement of failure falling in category B.I (b) above, an exemption can be made and the place of replacement supply can be indicated by the depot officer (at his option) in the warranty claim notice to the firm to be the end-user's place.

- (V) For warranty replacement of category B.I (b), due care will be taken by the end user to ensure that accountal of replacement supply etc, are properly taken care of After settlement of warranty claim the rejected material will be handed over by the end user to the firm's representative. The end user will also inform the depot officer who raised warranty claim about the replacement.

2. At the option of the depot officer/end user, rectification of the material rejected {under category 1.1 (A) and 1.1 (B)} may be permitted within Railway premises by the firm only after the firm has refunded the payment (if already made by Railway) or equivalent amount has been withheld for this purpose. However, from the date of communication of rejection advice, the rectification activity has to be completed within 21/45 days for indigenous/Imported material respectively for the rejection of the category 1.1 (B). If more time is taken beyond this, applicable ground rent will be levied on the firm.
