#### **2.10 .1 Deleted**

**2.10.1 (A)** Option Clause can be exercised anytime within the Delivery period or extended Delivery period, by giving reasonable notice.

**2.10.2 Deleted**

**2.10.2 (B)** 'Reasonable notice' as mentioned above is only for the purpose of allowing the contractor suitable time to make necessary arrangements for the supplies and not for seeking any consent from the contractor towards exercise of the contractual option clause. To this end, a reasonable delivery schedule for the enhanced ordered quantity stipulated in the relevant modification advice to the contract will suffice.

**2.10.3 Deleted**

**2.10.3(C) Deleted**

**2.10.4 Deleted**

**2.10.4.(D)** In a contract that provides for quantity option clause, in case Delivery Period is extended either for the full ordered quantity or a part quantity which remained unsupplied on the date of expiry of original delivery period, then during the extended delivery period also, quantity variations can be made on the total ordered quantities.

**2.11. Pilot Sample:**

**2.11.1** Whenever, in terms of the contract, firm is required to submit pilot sample, they will be required to submit minimum three samples for approval, if not specified otherwise. Out of that, one sample, if found suitable after testing, will be returned to the firm for reference purpose and for the guidance of the Inspection Agency, if required. One sample duly approved shall be retained by the Depot officer. The 3<sup>rd</sup> sample, if get destroyed during the testing, shall be accounted for by the Depot officer, provided same gets passed and found suitable during testing.

**2.11.2** In the event of a pilot sample failing the inspection/tests, all the samples whether intact or broken during a destructive test as the case may be, shall be returned to the supplier along with the inspection report, if any, provided by the inspecting/testing agency.

**2.11.3** Submission and collection of the sample shall be sole responsibility of the supplier.

**2.12. Quantity to be ordered:**

**2.12.1** Railways reserves the right to cancel the tender for full or part quantity tendered without assigning any reason. The rates quoted by the tenderers for the full quantity would be taken as valid even for part quantity.

**2.12.2** Wherever considered necessary by the purchaser, the quantity to be ordered can be split amongst two or more sources for ensuring better availability of material keeping in view the vital / critical nature of item, quantity to be procured, delivery requirements, capacity of the firms and past performance of the firms, in fair, transparent and equitable manner. In such cases the provisions of para 2.13 shall be normally applicable

**2.12.3** The Controller of Stores or any officer authorized on behalf of President of India acting through, General Manager is not bound to accept the lowest or any offer nor to assign any reason for doing so and reserves the right to accept any offer in respect of the whole or any portion of the item specified in the tender and contractor shall be required to supply at the rate quoted.

**2.13 Splitting of tendered quantity**

**2.13.1** Case of no prior decision to split the order

**2.13.1.1** Normally full order should be placed on L-1 firm. However, if after due processing, it is discovered that the quantity to be ordered is more than what L-1 alone is capable of supplying and there was no prior decision to split the quantities, then this aspect should be decided by the purchaser. The quantity being finally ordered will be distributed among the other bidders in a manner that will be fair, transparent and equitable. The manner of splitting will take specific note of the following parameters:

- i) Past performance of bidders
- ii) Capacity of bidders
- iii) Delivery requirements in the tender
- iv) Quantity under procurement
- v) Vital/safety nature of items

**2.13.1.2** In the absence of any differentiation on the above parameters, the manner of splitting will be

based on the stipulation given in para 2.13.2 below.

**2.13.2 Case of pre-decided split ordering:-**

**2.13.2.1** Railway may decide in advance to have more than one source of supply on account of delivery requirement in tender, past performance and capability of bidders, quantity under procurement and vital/safety nature of items.

**2.13.2.2** Following provisions {2.13.2.2 (A) to 2.13.2.B(ii)} shall be applicable in all such cases of pre-decided split ordering:-

- A) The purchaser reserves the right to distribute the procurable quantity on one or more than of the eligible tenderers. Zone of consideration of such eligible tenderers will be the right of the Purchaser. The zone of consideration will be a dynamic mix of inter-se position of firms, supply performance of the firms, quantity being procured, criticality of and lead time of supply of the item, number of established suppliers, their capacity etc.
- B) Whenever such splitting of the procurable quantity is made, the quantity distribution will depend (in an inverse manner) upon the differential of rates quoted by the tenderers (other aspects i.e. adequate capacity-cum-capability, satisfactory past performance of the tenderers, outstanding order load for the Railway making the procurement, quoted delivery schedule vis-à-vis the delivery schedule incorporated in the tender schedule incorporated in the tender enquiry etc. being same/similar) in the manner detailed in the table below:

Price differential between L1 & L2	Quantity distribution ration between L1 and L2
Upto 3%	60:40
More than 3% and upto 5%	65:35
More than 5%	At least 65% on the L1 tenderer. For the quantity to be ordered on the L2 tenderer, TC/TAA shall decide

In the phrase 'differential rates quoted by the tenderers, the quoted rate would mean :

- i) When no price negotiation has been called for, the original rates as obtained at the time of tender opening. However, the rate of the highest eligible tenderer within the zone of consideration has to be per se reasonable.
- ii) When price negotiation has been called for, the reference L1 rate for assessment of ratio will be the original rate of L1 firm (suitable for bulk quantity)- say firm "A"- as obtained at the time of tender opening.
- B (I) If splitting of quantity is required to be done by ordering on tenderers higher than the L2 tenderer, then the quantity distribution proportion amongst the tenderers will be decided by transparent/logical/equity based extrapolation of the model as indicated in the above para.
- B (II) There could be a situation when between the lowest firm considered suitable for bulk Qty. (L1 firm 'A') and another firm considered suitable for bulk quantity order, there are firms who are considered suitable only for developmental order. For example, say L1 firm 'A' is approved vendor, L4 is approved vendor (and both considered suitable for bulk quantity order) and splitting is to be done between these two approved vendors. But there are two developmental vendors in between who are suitable for part quantity. In such cases, L1 should be given its proportion based on its rate differential with respect to L4, (say by this, L1 gets 65% of NPQ). The balance Qty. (say 35% of NPQ) is to be distributed among other firms. The balance quantity is to be distributed as follows:
- (a) Allocate the developmental vendor L2 and developmental vendor L3 within the overall ceiling of 20% (of 35% of NPQ)
- (b) Allocate the balance quantity to L4 firm.

Since the developmental vendors are being given the order in relation to its lower position w.r.t. L4 (approved vendor), it will not attract the provision of 'order on developmental vendor should not be at higher rate than approved vendor' as the reference rate for comparison of L2 developmental vendor and L3 developmental vendor rate is the L4 approved vendor rate.

**2.13.2.3** Notwithstanding the above, there can be exceptional situations where Purchaser may come to a conclusion that splitting is neither possible nor feasible and/or not desirable in the administrative interest. In such exceptional situations, Purchaser reserves the right not to split the quantity despite pre-decided splitting clause in the tender condition.

**2.13.2.4** For cases where the Rlys./PUs had entered into Tot/JV agreements, the following clause should be stipulated as tender conditions:

As the Rly. has entered into Tot/JV agreement with ..... no. of firms, they reserve the right to place orders on all such Tot/JV agreements partners. However, for

ratio/proportion of quantity distribution among such agreement partners, conditions as detailed in para 2.13.2.2 (B) shall apply with the exception that the aspect of 'per-se responsibility'.

- 2.13.2.5** In the cases of inadequate capacity-cum-capability, dissatisfactory past performance, large quantity of outstanding orders (liquidation of which will take very long time) etc., the purchaser shall have the right to distribute the procurable quantity amongst tenderers with due consideration to these constraints and in such a manner that would ensure timely supply of material in requisite quantity to meet the needs of operation, maintenance, safety etc. of the Railways, regardless of inter-se ranking of the tenderers and in a fair and transparent manner with due conformity to the Principles of Natural Justice and Equity.

**2.14. Warranty/Guarantee:**

- 2.14.1.** Warranty period mentioned in specification/MDTS is applicable. If warranty period is not mentioned in respective specification/MDTS, standard warranty period as mentioned in IRS conditions is applicable.

In case, there is a discrepancy regarding warranty period mentioned in specification/MDTS and standard warranty clause, then warranty period mentioned in specification/MDTS shall prevail.

Tenderers should further note that if the Guarantee/Warranty is a part of the tendered specification and/or tender schedule, then any deviation on this count, shall be treated as a technical deviation, which may render their offer technically unsuitable. **Bidders are advised to bring such deviation(s) clearly in the technical deviation statement. In case, this deviation is not indicated in the technical deviation statement, it will be presumed that offer is as per the tendered specification in all respect. Any ambiguity in this regard or any other respect shall be to the disadvantage of the bidder.**

Further, Suppliers shall ensure that the materials are invariably stamped with manufacturers name and month & year of manufacture as may be detailed in drawing/specification of material to enable correct reckoning of warranty.

**2.14.2. Bank Guarantee towards Warranty obligation:**

For items like machinery and Plant, Costly equipment, capital spares, the tenderer, wherever called upon to do so, shall furnish a Bank Guarantee of 10% of Material value to cover their warranty obligation. The model proforma of the Warranty/Guarantee bond is annexed as Annexure 5.3. It would be the responsibility of the contractor to ensure that Bank Guarantee (BG) required to be submitted by them, should be sent directly by the issuing Bank under registered Post to the concerned Purchasing Authority and, in no case should be brought by the tenderer. That is to say, the firm shall not involve themselves in transmission of the BG between the issuing bank and the purchaser.

**2.15 Deleted**

- 2.16 Time for Making Risk Purchase:** Whereas Risk Purchase will be governed by the relevant clauses of IRS Conditions of Contract, such Risk Purchase shall be normally made within 9 months from the date of breach of Contract.

**2.17 Arbitration Clause:**

- 2.17.1.** In the event of any dispute or difference of opinion between the North-Eastern Railway administration and Contractor(s) as to respective right and obligation of the parties hereunder or of onus to the true intent and meaning of these present and of any articles of conditions thereof such dispute of difference of opinion (except the matter regarding which the decision has been specifically provided for in the terms of the contract) shall be referred to the sole arbitration as per para 2900 of IRS Conditions of Contract.

**2.17.2 Pre- Arbitration Meetings:**

To avoid the cumbersome & time consuming process of arbitration, pre-arbitration meeting with the contractors can be held for settlement of claim of contractors. However such meeting/discussions shall be without prejudice to the Railway's interest in the matter. If an understanding is reached between the administration and the contractor, discussions will be recorded indicating the claim admitted to the extent and the claim not admitted and the contractor's no claim certificate taken on that basis. In either case subsequent action shall be proceeded and the residual disputes if any, shall be referred to arbitration in terms of clause/Para 2.17.1 above.

**2.18. Jurisdiction of courts:**

The Courts of the place from where the acceptance of tender has been issued shall alone have jurisdiction to decide any dispute arising out of or in respect of the contract.

**2.19.** Compliance of provisions contained in Contract Labour (Regulation and Abolition) Act, 1970 shall be ensured by the Supplier wherever applicable in fulfilling the contractual obligations as per the scope of supply within the supply contract.

If L1 offer is not from a domestic manufacturer, the value of the order awarded to L1 tenderer will be the balance of procurement value after reserving specified percentage of the total value of the order for the eligible domestic manufacturer. Therefore, the lowest tenderer among the domestic manufacturers, whether L2, L3, L4 or higher, will be invited to match L1 offer in order to secure the procurement value of the order earmarked for the domestic manufacturer. In case first eligible tenderer (i.e. domestic manufacturer) fails to match L1 offer, the tenderer (i.e. domestic manufacturer) with next higher offer will be invited to match L1 offer and so on. However, Railway may choose to divide the order among more than one successful tenderer as long as all such tenderer match L1 and the criteria for allocating the tender quantity amongst a number of successful tenderer is clearly articulated in the tender document itself. In case, all eligible domestic manufacturers fail to match the L1 offer, the actual tenderer holding L1 offer will secure the order for full procurement value. **2.23.6** In case of turnkey/system integration projects, eligibility of a tenderer as a domestic manufacturer would be determined on the domestic value addition calculated only for the value of notified DMSPs forming part of the turnkey/system integration projects and not on the value of whole project.

#### **2.24.11 Revision regarding Public Procurement (Preference to Make in India) Order , 2017**

**Authority:-** Railway Board Letter No.2020/RS(G)/779/2 Dt 05.08.2024.

**Revised 'Public Procurement (Preference to Make in India), Order 2017" dated 05.08.2024 effective with immediate effect.**

**Whereas** it is the policy of the Government of India to encourage 'Make in India' and promote manufacturing and production of goods and services in India with a view to enhancing income and employment, and

**Whereas** procurement by the Government is substantial in amount and can contribute towards this policy objective, and

**Whereas** local content can be increased through partnerships, cooperation with local companies, establishing production units in India or Joint Ventures (JV) with Indian suppliers, increasing the participation of local employees in services and training them,

Now therefore the following Order is issued:

**1.** This Order is issued pursuant to Rule 153 (iii) of the General Financial Rules 2017.

**2. Definitions:** For the purposes of this Order:

*'Local content'* means the amount of value added in India which shall, unless otherwise prescribed by the Nodal Ministry, be the total value of the item procured (excluding net domestic indirect taxes) minus the value of imported content in the item (including all customs duties) as a proportion of the total value, in percent.

#### ***Explanatory notes for calculation of local content given above***

a Imported items sourced locally from resellers/distributors shall be excluded from calculation of local content.

b. The license fees/royalties paid/ technical charges paid out of India shall be excluded from local content calculation.

G Procurement/Supply of repackaged/refurbished/rebranded imported products as understood commonly shall be treated as reselling of imported products and shall be excluded from calculation of local content. The definition of repackaged/refurbished/rebranded imported products is as follows;

'Refurbishing' means repair or reconditioning of an imported product does not amount to manufacture because no new goods come into existence.

'Repackaging' means repacking of imported goods from bulk pack to smaller packs would not ordinarily amount to manufacture of a new item.

'Rebranding' means relabeling or renaming or change in symbol or logo/makes or corporate image of a company/organization/ firm for an imported product would amount to rebranding.

d. To ensure that imported items sourced locally from resellers/distributors are excluded from calculation of local content, bidders should submit, the cost of such locally-sourced imported items (Inclusive of taxes) along with break-up on license/royalties paid/technical expertise cost etc. sourced from outside India. For items sold by bidder as reseller, OEM certificate for country of origin to be submitted.

Suppliers is both MSE, Class –I local supplier.	MSE, Class –I local suppliers “
Supplier is MSE but no Class-I local supplier.	MSE but non Class-I local supplier
Supplier is not MSE but is Class-I local supplier.	Non-MSE but Class-I local supplier.
Supplier is neither MSE nor Class-I local	Non MSE non class-I local supplier.

4- The applicability of PPP MSE order and PPP-MII order in various scenarios involving simultaneous purchase preference to MSEs and Class-I local suppliers under PPP-MSE order and PPP-MII order respectively, shall be as under :-

a) Items covered under para 3(a) of PPP-MII order, 2017 for which Nodal ministry has notified sufficient local capacity and competition: For these items, only Class-I local suppliers are eligible to bid irrespective of purchase value. Hence, Class-II local suppliers or Non-local suppliers, including MSEs which are Class-II local suppliers/Non-local suppliers, are not eligible to bid. Possible scenarios can be as under :

- (i) L-1 is MSE class –I local supplier” -100% of the tendered quantity is to be awarded to L-1.

- (ii) L-1 is Non MSE but Class-I local supplier”- Purchase preference is given to MSEs as per PPP-MSE order. Balance quantity is to be awarded to the L-1 Bidder.
- b) Items reserved exclusively for procurement from MSEs as per PPP-MSE order. These items are reserved exclusively for purchase from MSEs. Hence non-MSEs are not eligible to bid for these items. Possible scenarios can be as under :
  - (i) L-1 is MSE class-I local supplier – 100% of the tendered quantity is to be awarded to L-1.
  - (ii) L-1 is MSE non class-I local supplier”- Purchase preference is to be given to class-I local supplier as per PPP-MII order. Balance quantity is to be awarded to L-1 bidder.
  - (c) If items are neither notified for sufficient local capacity nor reserved for MSEs, then the process will be as follows:
    - C (a) Items covered under Para 3A(b) or PPP-MII order are divisible items and both MSEs as well as Class-I local suppliers are eligible for purchase preference. Possible scenarios can be as under :
      - (i) L-1 is MSE class-I local supplier “-100% of the tendered quantity is to be awarded to L-1.
      - (ii) L-1 is Non MSE but class-I local supplier “- Purchase preference is to be given to MSEs , if eligible, as per PPP-MSE order. Balance quantity is to be awarded to L-1 bidder.
      - (iii) L-1 is MSE but non class-I local supplier”- Purchase preference is to be given to class-I local suppliers, if eligible, as per PPP-MII order. Balance quantity is to be awarded to L-1 bidder.
      - (iv) L-1 is Non MSE non class-I local supplier “- Purchase preference is to be given to MSEs as per PPP-MSE order. Thereafter purchase preference is to be given to class-I local suppliers for 50% of the tendered quantity minus quantity allotted to MSEs above as per PPP-MII order. For the balance quantity. Contract is to be awarded to L-1 bidder.(Kindly refer to the illustrative example in the annexure.)
    - C (b) Items covered under Para 3A(c) of PPP-MII order. 2017 are non divisible items and both MSEs as well as class-I local suppliers are eligible for purchase preference. Possible scenarios can be as under :
      - (i) L-1 is “ MSE class-I local supplier”- Contract is awarded to L-1
      - (ii) L-1 is not “ MSE class-I local supplier” but the “MSE class-I local supplier” falls within 15% margin of purchase preference –Purchase preference is to be given to lowest quoting “ MSE class-I local supplier”. If lowest quoting “MSE Class-I local supplier” does not accept the L-1 rates the next higher “MSE class-I local supplier” falling within 15% margin of purchase preference is to be given purchase preference and so on .
      - (iii) If conditions mentioned in sub para (i) and (ii) above are not met i.e. L-1 is neither “MSE class-I local supplier” nor “MSE class-I local supplier” is eligible to take benefit of purchase preference , the contract is to be awarded / purchase preference to be given in different possible scenarios as under :
        - (A) L-1 is MSE but non-class –I local supplier ”or Non MSE but class-I local supplier”- Contract is to be awarded to L1.
        - (B) L1 is Non-MSE non Class-I local supplier “- First purchase preference to be given to MSE as per PPP-MSE order. If MSE not eligible/does not accept-purchase preference to be given to class-I local supplier as per PPP-MII order. If Class-I local supplier also not eligible/does not accept contract to be awarded to L-1.
    - d. Items reserved for both MSEs and class-I local suppliers: These items are reserved exclusively for purchase from MSEs as well as Class-I local suppliers. Hence, only MSE class-I local supplier are eligible to bid for these items. Non MSEs/Class-II local suppliers/Non local suppliers cannot bid for these items. Hence the question of purchase preference does not arise.
    - e. Non-Local suppliers, including MSEs filling in the category of Non-local suppliers, shall be eligible to bid only against Global Tender Enquiry.

**Example explaining applicability in scenario explained in para 4 c (a) (iv)**

(Scenario: Divisible items, both MSEs as well as Class-I local suppliers eligible for purchase preference and L-1 is “Non-MSE non –class –I local supplier”)

**Item-** Desktop computer

**Qty-** 50 Nos.

**Details of bids received**

Sr.No.	Name of bidder	Rates quoted	Price Ranking	Status of bidder

Bidder C will be considered for order of 13 Nos . on confirmation of reduction of price .
2. For 50% of balance quantity of 37 number (tendered quantity of 50-13 awarded to bidder C ; assuming bidder C has confirmed to accept L1 rates ). purchase preference will be given to lowest Class-I local supplier as per PPP-MII Order Accordingly , bidder B will be invited to match L-1 price for 50% of Nos i.e. 18.5 (say 19 Nos of computers ). 1.1 Two kinds of rejection occur in case of pre-inspected supplies made by vendors.

- A. Pre-inspected material rejected by consignee at the time of receipt
- B. Material rejected in warranty.

The methodology of handling these rejections are dealt with below:

- A. Pre-inspected material rejected by consignee at the time of receipt
  - (i) In case of rejection of pre-inspected goods at consignee end, the material rejection advice/memo should be sent by consignee to all concerned i.e. firm, purchaser, pre-inspecting agency, paying authority as per the contract etc. without fail.
  - (ii) *Financial recovery*: In case payment has been made to the firm for the material, the concerned paying authority as per contract should note the rejection advice details in its recovery register for effecting recovery of payments made, as the case may be.
  - (iii) joint inspection of rejected material will be held with pre-inspecting agency and the firm. In case of failure of either of the two parties to associate with joint inspection, the joint inspection should be held by the consignee with whichever of the two parties comes for joint inspection. Irrespective of whether the party(ies) attend joint inspection or not, the modality of joint inspection etc will have to be completed within 21 days of communication of rejection advices to the supplier (in line with IRS Conditions of Contract clause 703). For imported material, the time limit will be 45 days.
  - (iv) Firm may be permitted to collect the rejected goods only after joint inspection( in case it is pre-inspected) and the firm has also deposited the payments already made by Railway (if any) to the firm or equivalent amount has been recovered for this purpose.
  - (v) In case of replacement supply against the rejected goods, the same should be pre-inspected by same pre-inspecting agency who passed the material earlier. In line with IRS conditions of Contract clause 703, no inspection charge will be paid by Railway to the inspection agency for the replacement supply.

- (vi) However, in case of component level rejection in an pre-inspected item (which is an assembly) the replacement supply of that component can be accepted based on firm's internal inspection certificate/guarantee certificate and final inspection by consignee.

- (c) Warranty clause is also applicable for spare parts/assemblies.

**4.9. Payment Terms:**

**4.9.1. For orders valued upto Rs. 5 lakh** - 100% payment will be made after inspection and receipt/installation and acceptance of equipment by the consignee.

7. The notification would also be applicable to all Central Schemes (CS)/ Central Sector Schemes (CSS) for the procurement of electronic products made by States and local bodies, if project or scheme is fully or partially funded by Government of India.

#### **8. Procedure for calculating local content/ domestic value addition**

Bill of Material sourced from domestic manufacturers (Dom-BOM) may be calculated based on one of the followings depending on data available. Each of these calculations should provide consistent result.

a. Sum of the costs of all inputs which go into the product (including duties and taxes levied on procurement of inputs except those for which credit/ set-off can be taken) and which have not been imported directly or through a domestic trader or an intermediary.

h. Ex-factory Price of product minus profit after tax minus sum of imported Bill of Material used (directly or indirectly) as inputs in producing the product (including duties

and taxes levied on procurement of inputs except those for which credit / set-off can be taken) minus warranty costs.

c. Market price minus post-production freight, insurance and other handling costs minus profit after tax minus warranty costs minus sum of Imported Bill of Material used as inputs in producing the product (including duties and taxes levied on procurement of inputs except those for which credit / set-off can be taken) minus sales and marketing expenses.

Total Bill of Material (Total-SOM) may be calculated based on one of the following depending on data available. Each of these calculations should provide consistent result.

- a. Sum of the costs of all inputs which go into the product (including duties and taxes levied on procurement of inputs except those for which credit / set-off can be taken).
- b. Ex-Factory Price of product minus profit after tax, minus warranty costs.
- c. Market price minus post-production freight insurance and other handling costs minus profit after tax, minus warranty costs minus sales and marketing expenses.

The percentage of domestic value-addition may be calculated based on information furnished as per the following formula:

$$\text{Percentage of local content / domestic value-addition} = \frac{\text{DOM} - \text{BOM}}{\text{Total} - \text{BOM}} \times 100$$

It is recommended that each agency assessing should calculate the domestic local content / value-addition using at least two of the above formulae so as to validate the assessments in this regard and ensure that the domestic value addition that is claimed is consistent.

## **9. Verification of local content/ Domestic Value Addition**

a. The local supplier at the time of tender, bidding or solicitation shall provide self-certification that the item offered meets the minimum local content and shall give details of the location(s) at which the local value addition is made.

b. In cases of procurement for a value in excess of Rs .10 crore, the local supplier shall provide a certificate from the statutory auditor or cost auditor of the company (in the case of companies) or from a practicing cost accountant or practicing chartered accountant (in respect of suppliers other than companies) giving the percentage of local content.

c. In case a complaint is received by the procuring agency or the concerned Ministry/Department against the claim of a bidder regarding local content / domestic value addition in an electronic product, the same shall be referred to STQC.

d. Any complaint referred to STQC shall be disposed of within 4 weeks. The bidder shall be required to furnish the necessary documentation in support of the domestic value addition claimed in an electronic product to STQC. If no information is furnished by the bidder, such laboratories may take further necessary action to establish the bonafides of the claim.

e. A complaint fee of Rs.2 Lakh or 1% of the value of the domestically manufactured electronic products being procured (subject to a maximum of Rs. 5

Lakh), whichever is higher. to be paid by Demand 11ra to be deposited with STQC. In case, the complaint is found to be incorrect, the complaint fee shall be forfeited. In case the complaint is upheld and found to be substantially correct, deposited fee of the complainant would be refunded without any interest.

f. False declarations will be in breach of the Code of Integrity under Rule 175(1)(i)(h)

Or the General Financial Rules for which a bidder or its successors can be debarred for up to two years as per Rule 151 (iii) of the General Financial Rules along with such other actions as may be permissible under law.

10. MeitY shall be the Nodal Ministry to monitor the implementation of the Electronic Products Notification.

11. In case or a question whether an item being procured is an electronic product to be covered under the Public Procurement (Preference to Make in India) Order 2017, the matter would be

referred to the Ministry of Electronics and Information Technology for clarification.

### **Sub: Handling of Warranty Rejections**

Ref: Railway Board's letter No.2000/RS(G)/379/2 dated 07.08.2015 and 18.01.2018.

#### **Background**

Consolidated instructions on handling of warranty rejections were issued vide Railway Board's letter no.2000/RS(G)/379/2 dated 07.08.2015 and 18-01-2018. These instructions primarily stipulate linking of warranty rejections to the concerned supplying stores depot and relevant purchase orders by the user and arrange for warranty replacements duly conducting joint inspections with pre-inspection agency and the firm. Review of Warranty Management system indicated practical difficulties in efficient handling of several of warranty issues, centralized database, monitoring of warranty settlement, resultant deterrent actions and system improvements. The system of handling warranty rejections is largely manual and whatever computerization is there, it is on separate systems which are not fully equipped to handle warranty rejections end-to-end, and are not integrated. Also, the policy did not cater for many scenarios which are encountered while dealing with the warranty rejections e.g. warranty rejections of components of Rolling Stocks supplied by Private/Govt/Railway units, cases where PO/stores depot/User depot is not linked, epidemic failures, inefficient marking on the items for linking of items to vendor/purchase orders, warranty claims by users, communication of warranty period to end user etc.

Under this background, the consolidated policy instructions on warranty rejection handling including an Online Integrated Warranty Management System over IR, covering entire warranty management landscape to include all types of warranty failures, including epidemic failures, keeping in view practical field conditions for implementation are being issued in this circular. This circular supersedes earlier circulars on the subject.

#### **1. Digitisation of Warranty Management System**

- i. The entire Warranty Management System shall be digitized and made paperless.
- ii. The existing maintenance Applications viz CMM, FMM, WISE, SLAM, PUs local system, etc. shall be integrated with UDM/ IMMS/IREPS for seamless transfer of required data. A provision shall be made on these platforms to facilitate end uses to register warranty complaints. Duplicate feeding on UDM is to be avoided. All systems dealing with warranty rejection of vendor and their response should have provision of uploading/attaching documents.
- iii. Provision shall be made on IREPS for the vendors to input dispatch details such as batch number, serial number, major sub component of the item, date of manufacturing (in MM/YYYY), expiry date (wherever applicable), manufacturer's marking, make/Brand, etc. against the Purchase Orders for each consignee. These details would be passed to iMMS/UDM and reflected in DRR/R-Note/CRN generated on iMMS/UDM and for indicating the same while issuing the materials through Issue Notes. Inspecting Agencies shall also indicate these details explicitly in the Inspection Certificate. End Consignee receiving the material from the vendor will verify these details at the time of receipt of material and explicitly indicate the same in iMMS/UDM.
- iv. Warranty period shall be captured in digital form as stated in Para 4 of this letter.
- v. Centralized Recovery Register shall be digitized & maintained in IPAS and linked with iMMS/UDM for seamless both-ways data flow between these applications for recovery.
- vi. The Warranty Rejections of vendors and their responses shall be linked with Unified Vendor Approval Module (UVAM). Cognizance of these warranty rejections of vendors shall be taken for reviewing the Approval of vendors by vendor approving authorities.
- vii. Cognizance of these warranty rejections of vendors shall be taken by the procuring authorities in deciding the tender cases.

**2. Materials are rejected under warranty in the following situations:**

- (A) Material rejected was issued to the user (shop/shed etc) from its attached Stores Depot or attached User Depot (both Stock & Non-stock).
- (B) Material rejected was received from a PU or a Stores Depot or a User Depot which is not the attached depot of the end user including that received directly through centralized procurement (both Stock & Non-stock).
- (C) Material was rejected in the field and was fitted at some other Workshop/Shed/Depot. Material either received or fitted through Supply Contract, Works Contract or Service Contract or any other type of contracts (both Stock & Non-stock).
- (D) Failure of components of Rolling Stocks received from Railway PUs/ PSUs/ Workshops/ Private Manufacturers

The Methodology of handling these rejections are dealt with below:

**(A) For Warranty rejection in Shop/Shed etc where rejected material was issued from its attached Stores Depot or attached User Depot (both Stock and Non-stock items)-**

i. In case the material was accounted for in Stores Depot in iMMS after receipt from vendor, enduser shall register the warranty complaints with reasons and other details, as required, on the Page 3 of 12 systems like CMM/FMM/WISE/SLAM/MU etc. available with them & electronically transfer such data to UDM through integrated system or shall register the warranty complaints directly in UDM (as convenient and practical for the end- user) and issue "Advice Note" of returned stores on UDM with the approval of competent authority (Gazetted Officer) to return the rejected material to attached Stores Depot for issuing "Warranty Rejection Advice" (i.e. warranty claims lodging) by attached Stores Depot.

However, in case the material was accounted for in User Depot in UDM after receipt from the vendor, there is no need for issuing "Advice Note" & to return the rejected material to attached Stores Depot.

"Warranty Rejection Advice" (i.e. warranty claims lodging) shall be issued to the firm with the approval of gazetted officer of the end consignee of attached Stores Depot/ User Depot (depending upon where rejected material was accounted for after receipt from vendor) on iMMS/UDM after getting the warranty rejected material from end-user.

Before, issuing the "Warranty Rejection Advice", the concerned user of iMMS/UDM & gazetted officer shall satisfy himself about the availability of the rejected material, correctness of PO (Purchase Order) and applicability of warranty period and ensure that other details including reason(s) for warranty rejection are genuine as per specification, drawing and terms and conditions of the Contract. This should be decided within 15 days.

ii. Rejected material shall be taken out from the ledger of Stock-Holder in iMMS/UDM (as the case may be). The "Warranty Rejection Advice" shall be issued on iMMS/UDM by attached Stores Depot/ User Depot to all concerned i.e. firm, purchaser, pre-inspecting agency, vendor approving agency, paying authority etc. as per the contract- without fail.

iii. In the Warranty Rejection Advice, the vendor shall be called upon for replacement of rejected stores or for deposition of equivalent amount of rejected material, within a period of 60 days from the date of

Warranty Rejection Advice. Date of issue of Warranty Rejection Advice by gazetted officer to be taken as date of Warranty Rejection Advice.

i. It shall be ensured that initiation of warranty complaint by user and issue of Warranty Rejection Advice in UDM/iMMS is not delayed by concerned officials/officers and warranty rejection advice should be issued within 15 days of detection of warranty complaint. However, if the warranty complaint is detected within warranty period, the “Warranty Rejection Advice” must be issued within warranty period.

On issue of “Warranty Rejection Advice”, the “Warranty Rejection Register” should automatically get updated.

ii. On getting the “Warranty Rejection Advice”, the inspecting agency shall take suitable action against the inspecting officials and ensure necessary corrective actions; duly informing the Officer who has approved the “Warranty Rejection Advice”. Recovery of inspection charges from the concerned inspecting agency for the rejected item(s) shall be made by any Bill Paying Authority across IR on pro-rata basis for the quantity and as per the rate of inspection charges for the inspection agency. Claim for recovery of inspection charges against the concerned 3rd party inspecting agency (like RITES etc.) shall automatically get noted into “Centralized Recovery Register” maintained in IPAS on the basis of “Warranty Rejection Advice”; which shall specifically mention the name of inspecting agency. After recovery of inspection charges by any Bill Paying Page 4 of 12 Authority, “Centralized Recovery Register” w.r.t. recovery of inspection charges to be automatically updated in IPAS to that extent so as to avoid multiple recoveries of inspection charges by different Railways and communicate the recovered amount to iMMS/ UDM.

iii. Any Bill Paying Authority across IR shall withhold the payment of equivalent amount of rejected material through “Centralized Recovery Register” from firm’s Bill(s) at the earliest, till the full amount is withheld and the same shall be released only after disposal/closure/settlement of the warranty claim or deposition of equivalent amount of rejected material or after recovery, whichever is earlier. After withholding of amount by any Bill Paying Authority, “Centralized Recovery Register” to be automatically updated in IPAS to that extent so as to avoid multiple withholdings by different Railways and communicate the withheld amount to iMMS/ UDM.

iv. Firm shall be allowed to collect the rejected materials only after deposition of payments already made by Railway (if any) to them or after recovery of equivalent amount by Accounts or against replacement quantity. Rejected material should be suitably defaced before handing-over to the firm to avoid re-use and necessary provision about digital capturing in respective modules may be done.

v. Warranty Quantity Replacementa.

a. Replacement of rejected quantity shall be made to the end consignee at the Stores Depot/User Depot which received the original supply from the firm.

b. The warranty quantity replacement will be supplied and accounted for in iMMS through R/Note & RO if “Warranty Rejection Advice” has been issued through iMMS. However, where “Warranty Rejection Advice” has been issued through UDM, the warranty quantity replacement will be supplied and accounted for in UDM through CRN. R-Note/CRN should be clearly marked as “Warranty Replacement CRN/R-Note, Not for Payment”.

ix. Replaced/rectified material shall have warranty for the replaced/rectified goods till the original warranty period plus the time from the warranty rejection advice to material replacement/rectification. x. Vendor would be permitted to lift the rejected material (subject to clause 2(A)(vii) above) “free of cost” within the period mentioned in Para 2(A)(iii) above. After this time, ground rent shall be applicable.

In cases where firm fails to lift the rejected material within the time period mentioned in para 3203 of IRS Condition of Contract, at the expiry of the period, no claim whatsoever shall lie against the Purchaser in respect of the said goods, which may be disposed of by the Purchaser in such manner as he thinks fit. Without prejudice to the generality of the foregoing, all the provisions in the Indian Railways Standard Conditions of Contract relating to the 'rejection of goods' and 'failure' and 'termination' add and Clause 3100-02 shall apply.

xi. In case disposal/closure/settlement of the Warranty Rejection Advice is not done by firm within the period of 60 days, Recovery Advice of equivalent amount of rejected material for which Warranty Claim has not been disposed/closed/settled shall be automatically sent from iMMS/UDM (depending upon from where Warranty Rejection Advice has been issued) to IPAS and the “Centralized Recovery Register” of IPAS shall be automatically updated for recovery. If any amount is already withheld against the “Warranty Rejection Advice”, the same shall be treated as recovered amount and adjusted accordingly. For balance amount, any Bill Paying Authority across IR shall recover the amount mentioned in “Centralized Recovery Register” from firm’s Page 5 of 12 Bill(s), if any. Paying Authorities should not delay the recovery and ensure recovery expeditiously. Even if the payable amount against a Bill and withheld amount are not enough for the full recovery against a Warranty Claim, the Paying Authority should proceed with partial recovery to the extent of payable amount against that Bill and balance recovery amount will remain in the “Centralized Recovery Register” for further recoveries from other

Bill(s). After recovery, the “Centralized Recovery Register” should be automatically updated immediately to avoid multiple recoveries by different Railways and communicate the recovered amount to IMMS/ UDM.

**xii.** Generally, no rejected quantity replacement/rectification should be allowed once recovery has been made by Accounts or the recovery amount has been deposited by vendor. While receiving fresh replacement supplies/allowing Re-inspection/Rectification/Amount deposition by vendor against Warranty Rejection Advice after the period of 60 days, user in IMMS/UDM must ensure that these activities are allowed only to the extent the Claim amount has not been recovered by Railways. Once recovery of the warranty claim amount is made in IPAS/deposition by the firm, user will not be allowed to initiate process of receipt of fresh replacement supplies / Reinspection / Rectification to the extent recovery of the Warranty Claim amount has been completed in IPAS/deposited by firm against Warranty Rejection Advice.

However, there may be some cases against a Warranty Rejection Advice like:

- a. Fresh replacement supplies have been received before recovery but material taken into Ledger by user after recovery
- b. Re-inspection or Rectification allowed before recovery but material taken into Ledger by user after recovery
- c. Amount deposited by vendor before recovery but details of such deposition entered by user after recovery
- d. Warranty Rejection Advice withdrawn altogether after recovery
- e. Any other incidence like Court /Arbitration Judgement/Order etc. after recovery In such cases, in all fairness; equivalent amount recovered has to be refunded to the vendor In case of (a) to (e) above, recovered inspection charges shall also be refunded to the inspection agency.

For such cases, the officer approving the Warranty Rejection Advice, with the approval of his officer next in hierarchy (minimum JA grade officer), can issue “Recovery Refund Letter” on iMMS/UDM on advice of the Stock Holder which shall be visible to all stake-holders including IPAS as well as vendor. Vendor may submit his Supplementary Bill on the basis of “Recovery Refund Letter” to the concerned Paying Authority which has deducted the refundable amount on-line or off-line; depending upon the case whether the Bill against which recovery has been made was submitted on-line or off-line. IPAS will pass-on information of all such refunds against a “Warranty Rejection Advice” to iMMS/UDM so that this information can be made available to all stake-holders. Necessary checks & balances should be provided in IPAS to ensure that vendor is not refunded the recovered amount more than the actual recovered amount or the amount mentioned in “Recovery Refund Letter”.

**xiii.** Inspection of Replacement Supply- In line with IRS Conditions of Contract clause 0703, Vendor shall bear all cost of such replacement including freight, cost of inspection and inspection charges to inspecting agency, if any, on such replacing and replaced stores but without being entitled to any extra payment on that or any other account. The replacement supply shall normally be inspected by the same inspection agency which inspected and passed the original supply. However, inspection clause for replacement of quantity rejected under warranty can be changed from 3rd Party Inspection (RITES/RDSO etc.) to Consignee Inspection with the approval of minimum JA grade level officer of the office issuing Warranty Rejection Advice, duly considering practicability of the case due to low quantity/value, criticality of the item, quality issues involved etc.

**(B) For Warranty rejection in Shop/Shed etc of the material received from a PU or a Stores Depot or User Depot which is not the attached Depot of the end user including that received directly through centralized procurement (both Stock and Non-stock items)-**

i. In such cases it may not be convenient for the end user to either return the material or communicate to the Stores Depot/User Depot (where the account of supply received from vendor was originally made). Thus, in all such cases, the warranty rejected material shall be kept in safe custody of the end user. End User shall register the warranty complaints with reasons and other details, as required, on the system like CMM/FMM/WISE/SLAM/MU etc. available with them and electronically transfer such data to UDM through integrated system or shall register the warranty rejections directly in UDM (as convenient and practical for the enduser). “Warranty Rejection Advice” (i.e. warranty claims lodging) shall be issued to the firm with the approval of gazetted officer of the end user on UDM after linking with PO, R/Note/CRN/Accountal Details.

Before, issuing the “Warranty Rejection Advice”, the concerned user of UDM & gazetted officer shall satisfy himself about the availability of the rejected material, correctness of PO and applicability of

warranty period and ensure that other details including reason(s) of warranty rejection are genuine as per specification, drawing and terms and conditions of the Contract

- ii. The “Warranty Rejection Advice” shall be issued on UDM by End User to all concerned i.e. firm, purchaser, pre-inspecting agency (if known), vendor approving agency, paying authority etc without fail.

**iii. Warranty Quantity Replacement**

- a. Replacement of rejected quantity shall be made at the end of end user.
- b. The warranty quantity replacement will be supplied and accounted for in UDM through CRN. The CRN should be clearly marked as “Warranty Replacement CRN, Not for Payment”.
- iv. Other provision shall be as per sub-Para (iii) to (xiv) of Para 2(A) above, except Para (viii) of 2(A)

**(C) For Warranty rejections in the field where material rejected was fitted at some other Workshop/Shed/Depot- Material either received or fitted through Supply Contract or Works Contract or Service Contract (both Stock and Non-stock items)-**

i. In such cases it may not be convenient for the end user to either return the material or communicate to the Stores Depot/User Depot (where the account of supply received from vendor was originally made) or to the concerned Workshop where items were fitted.

- ii. Such case shall also be dealt as per Para 2(B) above.

**(D) Warranty rejections of Rolling Stocks received from Railway PUs/PSUs/Workshops/Private Manufacturers and their components**

- i. Rolling Stocks are manufactured by following agencies:

SN	Type of Rolling Stocks	Manufactured by

4	Train-Sets	
5	MEMU, DEMU, EMU etc.	

ii. Manufacturing Units of Rolling Stocks should provide the following details of all components/subassemblies used/fitted in that rolling stock to inspecting agency as well as consignee railway/end user. Inspecting agency, during inspection of Rolling Stock shall ensure digital capture/entry of this data into the respective digital platform.

- a. Rolling Stock Number
- b. Name of the Rolling Stock supplier

- d. Contact details of Rolling Stock Supplier
- e. Name and address of component manufacturer and/or supplier.
- f. Date of manufacture of component (MM/YYYY).

- g. Inspecting agency for the component.
- h. Inspection details of component
- i. Warranty of component in months.
- j. Vendor Approving agency of the component.
- k. Batch/Product Marking, serial number etc of component
- l. Any further details to facilitate complete identification of the supplier of component by end user
- i. For individual components, all Rolling Stock Manufacturers/Suppliers shall be responsible to honour the warranty claims on the basis of warranty period of individual components instead of the entire rolling stock.
- ii. The warranty settlement will be processed as per procedure as under

**a. Rolling stock is supplied by a private manufacturer or Railway/other PSUs-**

Warranty claim shall be lodged against Rolling Stock supplier.

This shall be same case as 2(B) above except that in case of items appearing in the approved vendor list of vendor approving agencies, information about such cases shall also be shared with vendor approving agencies.

Rolling Stock Supplier shall be the interface between Railway and component supplier. He has to organize the complete warranty settlement. Any action by the component supplier shall be at the specific direction and authority of Rolling Stock supplier.

**b. Rolling stock supplied by Railway PUs, Workshop-**

In all such cases, the warranty rejected material shall be kept in safe custody of the end user. End User shall register the warranty rejections with reasons of rejection and other details, as required, on the system like CMM/FMM/WISE/SLAM/MU etc. available with them & transfer such data to UDM or shall register the warranty rejections directly in UDM (as convenient and practical for the end- user).

The concerned Railway PU or Workshop shall replace the rejected component within 60 days from warranty rejection registration date at the end of concerned end User registering the warranty rejection either as a fresh supply by Railway PU/workshop or get it replaced/rectified through the component manufacturer/supplier whose supplies have been rejected.

Simultaneously, the Railway PU/Workshop shall raise the warranty claim by issuing “Warranty Rejection Advice” on UDM on concerned component manufacturer/supplier separately from their end as per the process detailed in Para 2(B) above.

### **3. Rectification of the rejected stores**

- i. In case the vendor requests for rectification/repair of rejected stores in terms of Para 2, rectification/repair to be permitted in exceptional circumstances and only if the item can be effectively rectified/repared at the user end and with specific prior approval of the officer next in hierarchy (minimum JA grade officer) to the gazetted officer issuing Warranty Rejection Advice. At the option of the Depot Officer/ officer of end-user (depending upon who has issued the “Warranty Rejection Advice”), rectification/repair of rejected stores by the firm shall be permitted within railway premises only.
- ii. If firm requests to rectify/repair the rejected stores at its own premises, same shall be allowed only if the item has unique traceability to ensure that the rejected item cannot be supplied to any other consignee/user and if supplied, it can be traced. For taking out the rejected quantity for rectification/repair, equivalent value of rejected item shall be deposited by the firm.

iii. However, the rectification activity shall have to be completed within timelines given in subPara iii of case 2(A) from the date of issue of “Warranty Rejection Advice.” After this, process for recovery shall be initiated.

#### **4. Linking the rejected stores with PO, R/note, warranty period etc –**

**i.** Marking of stores has been mandated as per Clauses 1103, 1302, and 2704 of IRS Condition of Contract, which must be ensured.

**ii.** Specification/drawing of the item should include conditions for marking of the item for establishing unique traceability of the item, accountability and performance monitoring of the item/supplier. Marking should be with manufacturer’s name, lot/batch number, serial number, month and year of manufacture (in MM/YY format). If possible, Railways’ purchase order number and date, consignee code, suppliers’ IREPS vendor code and warranty period in number of months may also be included to have complete traceability. Drawing/specification must specifically indicate the types of acceptable marking mechanism/method. Marking method selection should be based on factors like item function, item geometry, type of surface, item size, operating environment, age/ life, criticality, cost, etc. Marking method prescribed in the drawing/specification should be good enough to ensure that unique traceability is possible for the lifecycle of the product and if not possible, at least up to the warranty period of the item.

**iii.** Direct Part Marking (DPM) for items shall be done based upon the criticality/cost/feasibility to have DPM of the item. The criticality/cost/feasibility shall be decided by the concerned Railway Board Directorates depending upon the nature of the item or/and its end use. This scheme will help in pinpointing the responsibility, shall improve traceability, accountability and performance monitoring of the item and that of the supplier. Part Marking should be part of specification and should at least indicate manufacturer’s name, lot/batch/item No., month, and year of manufacture in MM/YY format. If possible, Purchase Order number and date, consignee code, IREPS vendor code and warranty period in number of months may also be included. It shall be responsibility of the firm to develop a unique coding scheme/mechanism for ensuring traceability of its product. The firm shall intimate the same to the purchaser at the time of supply. In case it is not possible to have these details as part marking on the item, alternate marking scheme and its implementation may be decided by the concerned Directorates.

**iv.** Onus of marking and traceability as per purchase order shall be on vendor

**iii.** The record of fitment of item shall be captured digitally on UDM and/or other applications / Maintenance Modules like CMM/FMM/SLAM/WISE/MU etc.

**iv.** Capturing Warranty Period digitally in unambiguous terms:

**a.** In terms of RB letter No. 78/RS(G)/777/1 dated 07/05/2004:

**(i)** Warranty Clause specified in the tenders should normally be same as that in IRS conditions of contract.

**(ii)** Wherever it is considered necessary to have Warranty Clause in technical specifications at variance with Warranty Clause in IRS conditions of contract, then technical department, while submitting the indents, and while providing the specifications, will advise clearly about applicable Warranty Clause for procurement to avoid problems at post contract stage.

**(iii)** While procuring the material, it should be ensured that the applicable Warranty Clause is specified in tender documents clearly and in unambiguous terms.

**b.** Warranty clause if at variance with IRS conditions of contract shall be a specific clause in the tender/PO and shall supersede warranty clause of IRS conditions of contract. Page 10 of 12 Else it should be mentioned in tender conditions that warranty as per IRS conditions of contract is applicable. Both should never be included in the tender.

**c.** A field of Warranty period for the item under procurement may also be indicated on IREPS while floating tender for the same

**d.** Data of warranty period should be captured in digital form in terms of number of months and should get reflected in tender, contract, Inspection Certificate and R/Note in digital form and should be known to the end-user.

**e.** During inspection/receipt of the item, inspecting Agency and material accepting authority shall ensure marking as per purchase order.

**vii.** While issuing the stores, "Issue Note" should be linked with warranty period in months, RO number, PO number/date and Depot Code as well, so that supply details and exact warranty period is known to consignee/end user.

**viii.** IMMS and UDM systems should be able to provide the complete supply details i.e. PO No./ Date, Vendor Name, Challan No./Date, warranty period etc. for the consignment to be rejected.

**ix.** Online provision shall be made for entering the complete details of item as per Para 1 (iii) above by the vendor at the time of dispatch and that should be captured on iMMS/UDM while accepting the material.

**5.** All efforts should be made to link the warranty rejected item with P.O. However, if it is not possible to link the PO, warranty period mentioned in drawing/specification shall be taken into consideration or if not mentioned therein, it shall be as per IRS conditions of Contract. In such cases the warranty period shall be applicable from the end of month next to manufacturing month mentioned on material (assuming that stores are supplied after inspection after 30/45 days from the actual date of manufacture).

5.1 The Warranty settlement in such cases shall be as per para 2(B) above, except following

**a.** As PO details shall not be available, details of PO, R Note, CRN etc may not be included in Warranty Rejection Advice and other communications.

**b.** The value of rejected materials shall be decided on the basis of rate of component as per latest PO available.

**c.** If Inspecting Agency of the rejected store is not known, warranty rejection advice shall not be sent to inspecting agency and para 2(A)(v) shall not be applicable.

**d.** If Inspecting Agency of the rejected store is not known, the inspecting agency for the replacement supplies shall generally be as per the inspection policy followed for normal procurement or as per Para 2 (A-xiii) above.

## **6. Authority to adjudicate the disputed warranty cases and authority to decide appeal**

**i.** For all warranty rejection cases, the controlling officer of minimum JAG level of the office issuing "Warranty Rejection Advice" shall be adjudicating the disputed cases. His decision shall be binding on all the parties.

**ii.** All the disputes, legal matters, etc. arising out of warranty claim shall be handled directly by the office issuing the "Warranty Rejection Advice".

## **7. Handling Epidemic Failures**

Any recurring/large scale rejections from a particular lot will lead to epidemic failure.

**i.** Whenever the quantity rejected anytime during the warranty period exceeds 5% of the total supplied lot against a particular contract, it will be considered as Epidemic Failure. However, in case of failures related to items which are extremely critical from safety consideration (like critical components or sub-parts of air brake system, wheel discs, axles, propulsion system etc.), RDSO/PU may pre-define a lower percentage for considering the occurrence of epidemic failure. This condition should be declared in the tender document for procurement of such items.

ii. Same steps as mentioned at para 2, as applicable, to be followed. However, instead of rejecting only defected quantity, entire lot should be rejected. Even if some quantity of such lot has been used/fitted, the same may also be identified and called back from service, to the extent possible, by the concerned technical department for issuing warranty rejection.

iii. Joint Inspection shall be conducted as per extant provisions.

iv. In case warranty rejection is established in joint inspection, the vendor shall replace entire lot (as available, refer point ii above) duly inspected by inspecting agency as per contract on his own expenses.

v. Replacement supply should be inspected by the same agency which has previously inspected the supplies.

vi. Epidemic failure is essentially considered as very poor quality performance and should be reflected on the performance of vendor/Inspecting agency accordingly.

vii. Concerned Inspection /Quality monitoring/Vendor approving agencies should conduct root cause/failure analysis of the failure and QAP of vendor shall have to be re-validated. They should also suggest improvement in inspection methodology/Quality Assurance Plan to avoid failures.

8. In case the vendor disputes the Warranty Rejection as per Warranty Rejection Advice, representation from vendor should be sent through IREPS system to the officer issuing Warranty Rejection Advice within 7 days from the issue of Warranty Rejection Advice. In such case a joint inspection shall be organised by the officer issuing Warranty Rejection Advice for the grounds of warranty rejections mentioned in the Warranty Rejection Advice.

9. In all cases of warranty rejections where items are appearing in the approved vendor list of vendor approving agencies, information about such cases shall also be shared with vendor approving agency as per Para 1 (vi) above for performance monitoring and capability/capacity assessment/delisting/down gradation of the vendor and review of the design/specifications/STR if required. If required, based on merit of the case, Vendor approving agencies may take appropriate decision on suspension of inspection .

10. Data of the warranty rejections shall be analysed item-wise and vendor-wise by the Quality monitoring/vendor approving agency to identify the areas for improvements in systems, processes and design/specification.

11. The recovered amount from the vendor should be credited in the same allocation of the end use in which the item was originally procured.

12. Since complete process is being considered for digitisation, procurements (including Railway Board procurements) which are not being done through iMMS, should also be done through iMMS and Contracts issued through iMMS.

**NOTE:**

For ease of understanding, a sample flow chart for case 2(A) is enclosed. Other cases (Case 2(B) to 2(D)) involve only minor modifications of the same. In case of any difference between this circular paras and flow chart, the circular para shall prevail.

The purchaser reserves the right to counter offer the lowest acceptable rate for bulk ordering to the higher bidder(s). In the event of rejection of such counter offer(s), the purchaser will reserve their right to decide on the quantity distribution ratio/proportion.

**34.3** The rate of the highest eligible bidder within the zone of consideration has to be per-se, reasonable to the purchaser.

**34.4** In case of inadequate capacity-cum-capability, dissatisfactory past performance, large quantity of outstanding orders (liquidation of which will take very long time) etc. the Purchaser shall have the right to distribute the procurable quantity amongst bidders with due consideration to these constraints and in such a manner as would ensure timely supply of materials in requisite quantity to meet the needs of operation, maintenance, safety etc. of the Railways regardless of inter-se ranking of bidders

**35.0 PREFERENTIAL PURCHASE POLICY FOR MICRO AND SMALL ENTERPRISES  
(Please refer Para 2.24 of Part A)**

**35.1** Preferential purchase policies framed for Micro and Small Enterprises (MSEs) as per the Government's Public Procurement Policy on MSEs from time to time shall be applicable. The Public Procurement Policy on MSEs envisages certain benefits/preferential treatment to Micro and Small Enterprises (MSEs) for their participation in Government procurement as per guidelines of Govt. of India.

**35.2** At present, the benefits extended to MSEs as per Public Procurement Policy are as below:

- a. Tender sets shall be provided free of cost to MSEs registered for the item tendered with the agencies mentioned in clause 35.3 (a) below.
- b. MSEs registered with the agencies (mentioned in clause 35.3 (a) below) for the item tendered will be exempted from payment of Earnest Money.
- c. In tenders, participating MSEs quoting a price within price band of L 1 +15% shall be allowed to supply a portion of the requirement by bringing down their price to L 1 price in a situation, where L 1 price is from someone other than a MSE and such MSEs can be together ordered upto 20% of the total tendered value. 20% out of this 20% (i.e., overall 4 %) of procurement of goods and services will be from MSEs owned by Scheduled castes or scheduled tribes (SC/ST) entrepreneurs. In the event of failure of such MSEs to participate in the tender process or meet tender requirements and L 1 price, 4% sub-target of procurement earmarked from MSEs **owned by SC/ST Entrepreneurs** shall be met from "other MSEs".

**35.3** In order to extend the above benefits/preferential treatment to eligible MSEs, the following conditions shall apply:

**a.** MSEs who are interested in availing themselves of these benefits will enclose with their offer the proof of their being MSE registered with any of the agencies indicated below (in line with the notification dated 23.03.2012 of Ministry of MSME):

The registration certificate should also include information about the status in regard to their category i.e. whether the ownership of MSE pertains to SC/ST/Other category clearly. Absence of such information in the registration certificate would be taken as MSE falling in the category as "Others"

**35.4** For availing the facilities as above, the MSE's are required to submit with their offer copies of relevant documents indicating details of registration along with validity, name of the registering organization and details of the item, details of ownership etc, failing which such offers shall not be liable for consideration of benefits extended to MSE's and the tender case will be decided based on the available documents.
